33 kV Connection to Newton Ferrer PV over 9km route

Customer: Ralos New Energy UK Ltd.

DNO: Western Power Distribution " Location: St. Mellion, Cornwall, UK

GEW2 picked up this project in January of 2015 with almost an impossible task of completing the route by March 31st 2015.

The HV cable route ran through 35 fields, 12 landowners and consisted of 2 road closures spanning over 9 km. GEW2 has put 4 directional drilling machines and 6 separate civil crews onto this task in order to complete all the excavations on time for the end of March. GEW2 has supported the customer on site with last minute transformer change over and completed an extensive hand over package.

GEW2 has negotiated and obtained a Crossing Deed from Wales & West Utilities for crossing the high pressure gas main.

Cable installation in rock

WPD Joint Bay
